Notes: FY is fiscal year. Beneficiaries (enrollees for whom payments are made) are shown here because they provide the only historical time series data directly available prior to FY 1990. Most current analyses of individuals in Medicaid reflect enrollees. For additional discussion, see <https://www.macpac.gov/macstats/data-sources-and-methods/>. The increase in FY 1998 reflects a change in how Medicaid beneficiaries are counted: beginning in FY 1998, a Medicaid-eligible person who received only coverage for managed care benefits was included in this series as a beneficiary. Excludes Medicaid-expansion CHIP and the territories. Children and adults who qualify for Medicaid on the basis of a disability are included in the disabled category. In addition, although disability is not a basis of eligibility for aged individuals, states may report some enrollees age 65 and older in the disabled category. Unlike the majority of MACStats, this exhibit does not recode individuals age 65 and older who are reported as disabled, due to lack of detail in the historical data. Generally, individuals whose eligibility group is unknown are persons who were enrolled in the prior year but had a Medicaid claim paid in the current year.

For MACPAC's analysis, Medicaid enrollees were assigned a unique national identification number using an algorithm that incorporates state-specific ID numbers and beneficiary characteristics such as date of birth and gender. The national enrollment counts shown here are unduplicated using this national ID.
