**Notes:** FMAP is federal medical assistance percentage; E-FMAP is enhanced FMAP; ACA is Patient Protection and Affordable Care Act (P.L. 111-148, as amended). The federal government's share of most Medicaid service costs is determined by the FMAP, with some exceptions. For Medicaid administrative costs, the federal share does not vary by state and is generally 50 percent. The E-FMAP determines the federal share of both service and administrative costs for CHIP, subject to the availability of funds from a state's federal allotments for CHIP.

FMAPs for Medicaid are generally calculated based on a formula that compares each state's per capita income relative to U.S. per capita income and provides a higher federal match for states with lower per capita incomes, subject to a statutory minimum (50 percent) and maximum (83 percent). The general formula for a given state is:  $FMAP = 1 - \text{State per capita income squared} / \text{U.S. per capita income squared} \times 0.45$ .

Medicaid exceptions to this formula include the District of Columbia (set in statute at 70 percent) and the territories (set in statute at 55 percent). Other Medicaid exceptions apply to certain services, providers, or situations (e.g., services provided through an Indian Health Service facility receive an FMAP of 100 percent). Enhanced FMAPs for CHIP are calculated by reducing the state share under regular FMAPs for Medicaid by 30 percent. Table posted online March 25, 2015.

<sup>1</sup> For certain newly eligible individuals under the Medicaid expansion beginning in 2014, there is an increased FMAP (100 percent in 2014 through 2016, phasing down to 90 percent in 2020 and subsequent years). An increased FMAP is also available for certain states that previously expanded eligibility to low-income parents and non-pregnant adults without children prior to enactment of the ACA.

<sup>2</sup> Under the ACA, beginning on October 1, 2015, and ending on September 30, 2019, the enhanced FMAP will be increased by 23 percentage points, not to exceed 100%, for all states.

<sup>3</sup> Louisiana received a disaster-recovery state FMAP adjustment for the fourth quarter of FY 2011, and FY 2012–FY 2014.
