**Notes:** Beneficiaries (enrollees for whom payments are made) are shown here because they provide the only historical time series data directly available prior to fiscal year (FY) 1990. Most current analyses of individuals in Medicaid reflect enrollees. For additional discussion, see Section 5 of MACStats. The increase in FY 1998 reflects a change in how Medicaid beneficiaries are counted: beginning in FY 1998, a Medicaid-eligible person who received only coverage for managed care benefits was included in this series as a beneficiary. Excludes Medicaid-expansion CHIP and the territories.

Children and adults who qualify for Medicaid on the basis of a disability are included in the disabled category. In addition, although disability is not a basis of eligibility for aged individuals, states may also report some enrollees age 65 and older in the disabled category. Unlike the majority of the June 2014 MACStats, this table does not recode individuals age 65 and older who are reported as disabled, due to a lack of necessary detail in the historical data. Generally, individuals whose eligibility group is unknown are persons who were enrolled in the prior year but had a Medicaid claim paid in the current year.

<sup>1</sup> This table shows the number of beneficiaries. See Table 11 for the number of Medicaid enrollees in FY 2011, which is larger than the number of beneficiaries. Due to the unavailability of several states' Medicaid Statistical Information System (MSIS) Annual Person Summary (APS) data for FY 2011, which is the source used in prior editions of this table, MACPAC calculated enrollment from the full MSIS data files that are used to create the APS files. As a result, FY 2011 figures shown here are not directly comparable to earlier years. For MACPAC's analysis, Medicaid enrollees were assigned a unique national identification (ID) number using an algorithm that incorporates state-specific ID numbers and beneficiary characteristics such as date of birth and gender. The beneficiary counts shown here are unduplicated using this national ID.
