Notes: Includes federal and state funds. Excludes administrative spending, the territories, and Medicaid-expansion CHIP. Children and adults under age 65 who qualify for Medicaid on the basis of a disability are included in the disabled category. About 706,000 enrollees age 65 and older are identified in the data as disabled; given that disability is not an eligibility pathway for individuals age 65 and older, MACPAC recodes these enrollees as aged. Benefit spending from Medicaid Statistical Information System (MSIS) data has been adjusted to reflect CMS-64 totals. Due to changes in both methods and data, figures shown here are not directly comparable to earlier years. With regard to methods, spending totals now exclude disproportionate share hospital (DSH) payments, which were previously included. In addition, due to the unavailability of several states' MSIS Annual Person Summary (APS) data for fiscal year (FY) 2011, which is the source used in prior editions of this table, MACPAC calculated spending and enrollment from the full MSIS data files that are used to create the APS files. See Section 5 of MACStats for additional information.

Zeroes indicate amounts less than 0.05 percent that round to zero. Dashes indicate amounts that are true zeroes.

- 1 These percentages are likely to be underestimated because comparisons with other data sources indicate that some states do not identify all of their limited-benefit enrollees in MSIS.
- 2 Calculated by removing limited-benefit enrollees and their spending. In this table, enrollees with limited benefits are defined as those reported by states in MSIS as receiving coverage of only family planning services, assistance with Medicare premiums and cost sharing, or emergency services. Additional individuals may receive limited benefits for other reasons, but are not broken out here.
- 3 Maine (\$2.3 billion in benefit spending and 0.4 million enrollees) and Tennessee (\$7.9 billion in benefit spending and 1.5 million enrollees) were excluded due to MSIS spending data anomalies.
- 4 Due to large differences in the way managed care spending is reported by Vermont in CMS-64 and MSIS data, MACPAC's adjustment methodology is only applied to total Medicaid spending.

Sources: MACPAC analysis of Medicaid Statistical Information System (MSIS) annual person summary (APS) data and CMS-64 Financial Management Report (FMR) net expenditure data from CMS as of February 2014.
