

TABLE 18. Medicaid and CHIP Enrollment by Data Source and Enrollment Period Among Adults Age 19–64, 2011

Medicaid and CHIP Enrollment Among Adults Age 19–64	Administrative Data		Survey Data (NHIS)
	Ever enrolled during the year	Point in time	Point in time
Medicaid	28.8 million	22.2 million	Not available
CHIP	0.2 million	0.2 million	Not available
Totals for Medicaid and CHIP	29.0 million	22.4 million	17.8 million
Adults Age 19–64	Census Bureau		Survey Data (NHIS)
	192.1 million	191.4 million	187.4 million, excluding active-duty military and individuals in institutions
Medicaid and CHIP Enrollment as a Percentage of All Adults Age 19–64			
	15.1%	11.7%	9.5%

See Table 19 for notes.

Sources: MACPAC analysis of Medicaid Statistical Information System (MSIS) data as of February 2014, CHIP Statistical Enrollment Data System (SEDS) data as of May 2014, data from the National Health Interview Survey (NHIS), and U.S. Census Bureau vintage 2012 data on the monthly postcensal resident population by single year of age, sex, race, and Hispanic origin.

TABLE 19. Medicaid and CHIP Enrollment by Data Source and Enrollment Period Among Adults Age 65 and Older, 2011

Medicaid and CHIP Enrollment Among Adults Age 65 and Older	Administrative Data		Survey Data (NHIS)
	Ever enrolled during the year	Point in time	Point in time
Medicaid	6.5 million	5.6 million	Not available
CHIP	–	–	Not available
Totals for Medicaid and CHIP	6.5 million	5.6 million	3.1 million
Adults Age 65 and Older	Census Bureau		Survey Data (NHIS)
	41.7 million	41.1 million	39.7 million, excluding active-duty military and individuals in institutions
Medicaid and CHIP Enrollment as a Percentage of All Adults Age 65 and Older			
	15.5%	13.7%	7.9%

Notes: Excludes U.S. territories. Medicaid enrollment numbers obtained from administrative data include 8.8 million individuals ever enrolled during the year who received limited benefits (e.g., emergency services only, Medicaid payment only for Medicare enrollees’ cost sharing), of whom 0.5 million were under age 19, 6.7 million were age 19 to 64, and 1.6 million were age 65 or older. In the event individuals were reported to be in both Medicaid and CHIP during the year, individuals were counted only once in the administrative data based on their most recent source of coverage. Overcounting of enrollees in the administrative data may occur because individuals may move and be enrolled in two states’ Medicaid or CHIP programs during the year; however, Medicaid enrollment counts shown here are unduplicated using unique national identification (ID) numbers. The National Health Interview Survey (NHIS) excludes individuals in institutions (such as nursing homes) and active-duty military; in addition, surveys such as NHIS generally do not count limited benefits as Medicaid/CHIP coverage. Administrative data and Census Bureau data are for FY 2011 (October 2010 through September 2011); the NHIS data are for sources of insurance at the time of the survey in calendar year 2011. The Census Bureau number in the ever-enrolled column was the estimated U.S. resident population in the month in FY 2011 with the largest count; the number of residents ever living in the United States during the year is not available. The Census Bureau point-in-time number is the average estimated monthly number of U.S. residents for FY 2011.
