**EXHIBIT 15. (continued)**

**Notes:** FY is fiscal year. Full-year equivalent (FYE) may also be referred to as average monthly enrollment. Enrollment numbers generally include individuals ever enrolled in Medicaid-financed coverage during the year, even if for a single month; however, in the event individuals were also enrolled in CHIP-financed Medicaid coverage (i.e., Medicaid-expansion CHIP) during the year, they are excluded if their most recent enrollment month was in Medicaid-expansion CHIP. Numbers exclude individuals enrolled only in Medicaid-expansion CHIP during the year and enrollees in the territories. Children and adults under age 65 who qualify for Medicaid on the basis of disability are included in the disabled category. About 746,000 enrollees age 65 and older are identified in the data as disabled; given that disability is not an eligibility pathway for individuals age 65 and older, MACPAC recodes these enrollees as aged.

For MACPAC's analysis, Medicaid enrollees were assigned a unique national identification number using an algorithm that incorporates state-specific ID numbers and beneficiary characteristics such as date of birth and gender. The state and national enrollment counts shown here are unduplicated using this national ID. Categories may not sum to total for each state due to rounding. In addition, the sum of the state totals exceeds the national total because individuals may be enrolled in more than one state during the year.

<sup>1</sup> In this exhibit, full-benefit enrollees column excludes enrollees reported by states in the Medicaid Statistical Information System (MSIS) as receiving coverage of only family planning services, assistance with Medicare premiums and cost sharing, or emergency services.

<sup>2</sup> State had a change in total FYE enrollees of 10 percent or more over the prior year. These data may reflect data anomalies in the submission of MSIS data for the current or prior years and may be updated in future MSIS submissions by states. MSIS data anomalies have been compiled and reported by Mathematica Policy Research; the data anomalies report may be found at: <http://www.cms.gov/Research-Statistics-Data-and-Systems/Computer-Data-and-Systems/MedicaidDataSourcesGenInfo/downloads/anomalies1.pdf>.

<sup>3</sup> When compared to the December 2015 edition of this table, District of Columbia and Massachusetts had a change in total FYE enrollees of 10 percent or more over the prior year. However, both states have since updated their 2012 enrollment total and no longer has a change of 10 percent or more.

<sup>4</sup> States were excluded due to data reliability concerns regarding completeness of monthly claims and enrollment data.
