Notes: FY is fiscal year. FYE is full-year equivalent. FYE may also be referred to as average monthly enrollment. Includes federal and state funds. Excludes spending for administration and Medicaid-expansion CHIP enrollees. Enrollment counts come from CMS-64 enrollment data and may differ from other data sources. Quarterly enrollment was tabulated from the most recent non-zero CMS-64 submission to account for any lag in reporting; this typically is the report submitted three quarters later (e.g., January–March 2017 enrollment was taken from the submission quarter ending December 31, 2017). Unlike other MACStats exhibits that show spending per FYE, this exhibit includes spending for disproportionate share hospital (DSH) and certain incentive and uncompensated care pool payments made under Section 1115 waiver expenditure authority.

– Dash indicates zero.

¹ Not all states had certified their CMS-64 Financial Management Report (FMR) submissions as of July 20, 2018. California's fourth quarter submission was not certified; North Dakota's second, third, and fourth quarter submissions were not certified; Alabama's first quarter submission was not certified. Figures presented in this exhibit may change if states revise their expenditure data after this date.

² Newly eligible adults include those enrollees who are newly eligible under Section 1902(a)(10)(A)(i)(VIII) of the Social Security Act and receive a federal matching rate of 100 percent for quarters in calendar year 2016 and 95 percent for quarters in calendar year 2017.

³ New York's CMS-64 quarterly enrollment data was missing the last two quarters of FY 2017 for all enrollees and for newly eligible adults. The FYE count displayed here is the average monthly enrollment based on the first two quarters of enrollment. New York reports negative spending for the newly eligible adults due to large negative prior period adjustments.

Source: MACPAC, 2018, analysis of CMS-64 FMR net expenditure data as of July 20, 2018, and CMS-64 enrollment reports as of September 19, 2018.
