**EXHIBIT 6.** (continued)

**Notes:** FY is fiscal year. FMAP is federal medical assistance percentage. E-FMAP is enhanced FMAP. Q is quarter. The federal government's share of most Medicaid service costs is determined by the FMAP, with some exceptions. For Medicaid administrative costs, the federal share does not vary by state and is generally 50 percent. The E-FMAP determines the federal share of both service and administrative costs for CHIP, subject to the availability of funds from a state's federal allotments for CHIP.

FMAPs for Medicaid are generally calculated based on a formula that compares each state's per capita income to U.S. per capita income and provides a higher federal match for states with lower per capita incomes, subject to a statutory minimum (50 percent) and maximum (83 percent). The general formula for a given state is:  $FMAP = 1 - [(state\ per\ capita\ income\ squared \div U.S.\ per\ capita\ income\ squared) \times 0.45]$ .

Medicaid exceptions to this formula include the District of Columbia (set in statute at 70 percent) and the territories (set in statute at 55 percent). Other Medicaid exceptions apply to certain services, providers, or situations (e.g., services provided through an Indian Health Service facility receive an FMAP of 100 percent). E-FMAPs for CHIP are calculated by reducing the state share under regular FMAPs for Medicaid by 30 percent.

<sup>1</sup> For certain newly eligible individuals under the Medicaid expansion beginning in 2014, there is an increased FMAP (100 percent in 2014 through 2016, phasing down to 90 percent in 2020 and subsequent years). An increased FMAP is also available for certain states that expanded eligibility to low-income parents and non-pregnant adults without children before enactment of the Patient Protection and Affordable Care Act (ACA, P.L. 111-148, as amended).

<sup>2</sup> The Families First Coronavirus Response Act of 2020 (FFCRA, P.L. 116-127) provides a temporary 6.2 percentage point FMAP increase during a public health emergency for each calendar quarter occurring during the period beginning on the first day of the public health emergency period, as defined in Section 1135(g)(1)(B) of the Social Security Act (the Act), and ending on the last day of the calendar quarter in which the last day of such emergency period occurs. The Secretary of the U.S. Department of Health and Human Services declared a public health emergency on January 31, 2020, with an effective date of January 27, 2020, meaning the FMAP increase is effective January 1, 2020. States, including the District of Columbia and the territories, must meet certain maintenance-of-effort requirements to qualify for the FMAP increase. The FMAP increase does not apply to the Medicaid expansion population or other services such as those received at an Indian Health Service facility that already receive a higher matching rate.

<sup>3</sup> Because the public health emergency period was in effect for all of FYs 2021 and 2022, this exhibit displays only the FY 2021 and 2022 FMAPs and E-FMAPs with the 6.2 percentage point increase under the FFCRA.

<sup>4</sup> Section 5131(a) of the Consolidated Appropriations Act, 2023 (P.L. 117-328) subsequently amended the FFCRA to phase down the FMAP increase during calendar year 2023. For the quarter beginning April 1, 2023, and ending June 30, 2023 (Q3 of FY 2023), the FMAP increase is 5 percentage points. For the quarter beginning July 1, 2023, and ending September 30, 2023, the FMAP increase is 2.5 percentage points (Q4 of FY 2023). For the quarter beginning October 1, 2023, and ending December 31, 2023 (Q1 for FY 2024), the FMAP increase is 1.5 percentage points. Section 5131(b) of the Consolidated Appropriations Act, 2023 added a new §1902(tt) of the Act that requires states submit to CMS certain monthly data about activities related to eligibility redeterminations conducted during the period from April 1, 2023, to June 30, 2024. If a state does not satisfy the reporting requirements in §1902(tt) during the period from July 1, 2023, to June 30, 2024, CMS shall reduce the FMAP for the state by the number of percentage points (not to exceed 1 percentage point) equal to the product of 0.25 percentage points and the number of fiscal quarters during such period for which the state has failed to satisfy the reporting requirements.

<sup>5</sup> The FMAPs displayed for FY 2024 are the percentages that are in effect for January 1, 2024, to September 30, 2024. The FMAPs for the first quarter of FY 2024 would receive a 1.5 percentage point increase under the Consolidated Appropriations Act, 2023 (see footnote 4).

<sup>6</sup> Because the E-FMAP in Section 2105(b) of the Act is calculated based on the FMAP, the E-FMAP is also higher for states, though not in the same amount, for the duration of the public health emergency period.

<sup>7</sup> Under numerous legislation that was subsequently consolidated under the Consolidated Appropriations Act, 2023 (P.L. 117-328), American Samoa, Guam, Northern Mariana Islands, and the Virgin Islands receive an FMAP of 83 percent beginning December 21, 2019, and Puerto Rico receives an FMAP of 76 percent from December 21, 2019, through December 3, 2021, and January 1, 2022, through September 30, 2027, but would receive its normal FMAP of 55 percent between December 4, 2021, and December 31, 2021. The E-FMAPs for FYs 2021–2024 were calculated off these increased FMAPs.
